

Key Investor Information Document

This document provides you with key investor information about this fund. It is not marketing material. The information provided is required by law and is intended to help you understand the nature and risks of investing in this fund. We recommend that you read this information so that you can make an informed decision about whether to invest.

ACTIAM Verantwoord Index Aandelenfonds Opkomende Landen (ISIN-code NL0011872635)

This fund is managed by ACTIAM N.V., a subsidiary of VIVAT N.V.

Objective and investment policy

Objective

The objective of ACTIAM Verantwoord Index Aandelenfonds Opkomende Landen is to achieve a return that is identical to the return of the MSCI Emerging Markets Index Net EUR, the benchmark ('Index').

Investment policy

- The fund invests exclusively in the investment vehicle ACTIAM Responsible Index Fund Equity Emerging Markets.
- ACTIAM Responsible Index Fund Equity Emerging Markets invests in shares or certificates of shares of listed companies in Emerging Markets and may also temporarily invest in Exchange Traded Funds and derivatives, exclusively in equity futures.
- The Index is physically replicated by investing in shares or certificates of shares of companies that are part of the Index and that meet the Environmental, Social and Governance (ESG) criteria. A negative assessment may result in a company being excluded and no longer being invested in.

- The exclusion of companies leads to a deviation between the return of ACTIAM Responsible Index Fund Equity Emerging Markets and the return of the Index. This deviation is minimised by investing the proceeds in shares of companies which do meet ESG criteria with risk characteristics comparable to those of the excluded shares.
- The asset management of the ACTIAM Responsible Index Fund Emerging Markets is outsourced to Amundi Asset management S.A.

Entry and exit

You can buy or sell shares in this fund on any trading day via Euronext Amsterdam.

Dividend

The fund pays out a cash dividend at least once a year.

Risk and return profile

The indicator is a measure of the volatility of the price and the return potential. This fund invests in equities and therefore its volatility is high.

Historical figures used to calculate the synthetic indicator are not necessarily a reliable reflection of the future risk profile. There is no guarantee that the risk and return category shown will remain unchanged. The category may change. The lowest category does not mean that the investment is without risk.

The following risks are essential to this fund:

- Equity risk: The risk of loss in value due to negative movements in share prices.
- Currency risk: Risk of depreciation in currencies other than euro.
- Tracking error risk: Shares that are excluded as a result of ESG criteria may outperform the benchmark, thus causing the fund to lag behind the benchmark.

For a complete overview of the risks inherent in this fund, please refer to the supplement to this fund and the section on risk factors in the prospectus.

Charges for this fund

The charges that you pay are used to pay for the costs of operating the fund, including marketing and distribution costs. These charges reduce the potential growth of/return on your investment.

Non-recurring charges that are charged before or after you have invested	
Entry charges	0,15%
Exit charges	0,22%
This is the maximum amount that can be deducted from your investment	
Charges that are deducted from the fund each year	
Ongoing charges figure	0,24%
Charges that are deducted from the fund subject to certain conditions	
Performance fee	n/a

In this context, the fund's entry and exit charges refer to the increases and decreases in the net asset value that are charged on a net basis at the time of entry or exit respectively. These are credited to the fund and compensate for the transaction costs incurred by the fund.

In addition to the abovementioned entry and exit charges charged by the fund, your financial advisor, bank or distributor may, for example, charge additional costs. Please contact them for information about these charges.

The percentage of the Ongoing charges figure is based on the expenses for the whole year up to and including 31 December 2019. The percentage of the Ongoing charges figure may vary from year to year. It excludes portfolio transaction costs incurred by the fund.

More information about charges can be found in the prospectus of the fund.

Past performance

Past performance does not guarantee future returns. The stated returns are after deduction of all charges, but before the effects of the income tax to be paid by the investor.

Currency: euro

On 29 May 2017 ACTIAM Verantwoord Index Aandelenfonds Opkomende Landen was admitted to listing on Euronext in Amsterdam.
