The notice and the application of the principles of good governance and anti-corruption efforts
	Principles related to the environment	
	<ol style="list-style-type: none"> 7. No systematic involvement in severe environmental damage 	Idem as c.

Material Sustainable Drivers

	Drivers	
	Fossil fuel use	Management of fossil fuels use, impacting among other things climate change, air pollution, energy availability and human health
	Water use	Management of freshwater use in water scarce areas, impacting among other things water availability, water quality, health and food production
	Land use	Land conversion management especially for agricultural purposes, impacting climate change, biodiversity loss, and water flows but also local communities and inequalities.
	Chemicals and waste management	Management of toxic and long-lived chemical substances and (hazardous) waste and plastics, impacting the environment and human health.
	Social capital management	Actions to maintain the license to operate on which businesses and sovereigns depend, impacting human rights, community relations, social equity and access and affordability of for instance health care and finance.
	Human capital management	Activities related to labour and union rights, employee health & safety and labour practices, impacting educational opportunities and income and gender inequality.
	Organisational behaviour and integrity	Actions to create an ethical business environment, impacting community networks, justice and work conditions. For companies this refers to their own business model, but also to how they treat companies up- and downstream in their value chain. For sovereigns this refers to how they govern human, civic and political rights.

Every year, ACTIAM conducts hundreds of engagements with investees to encourage action upon their sustainability risks and opportunities. This way, these companies are preparing themselves for a sustainable transition. Engagement means entering into a dialogue with companies to steer behavior in a positive direction. The dialogue can be of a responsive nature in response to specific incidents, or proactive, to propose solutions with which the companies can move upwards in the acceptable investment universe of ACTIAM.
