

Key Investor Information Document (KIID)

This document provides you with key investor information about this fund. It is not marketing material. The information provided is required by law and is intended to help you understand the nature and risks of investing in this fund. We recommend that you read this information so that you can make an informed decision about whether to invest.

ACTIAM Impact Wereld Aandelenfonds

(ISIN-code NL0010579124)

This fund is managed by ACTIAM N.V., a subsidiary of VIVAT N.V.

Objective and investment policy

Objective

The investment objective is to achieve a return that, based on an evaluation period of three years, is at least equal to the return of the MSCI All Country World Index Net EUR (the "benchmark"). In addition to pursuing a financial return objective, it is expressly aimed to also add non-financial value. Especially by investing in companies that actively contribute to realizing the Sustainable Development Goals ("SDGs"), such as adopted by the United Nations (UN). At the same time a negative impact on planetary boundaries is limited, such as specified by the Stockholm Resilience Center Rockström et al. (2009).

Investment policy

- The fund invests in liquid shares of listed companies in Europe, North America, Asia and emerging markets.
- Companies in the fund are assessed on their environmental, social and governance achievements (ESG criteria). While taking account of the fund's return objective, the fund strives to achieve the highest possible ESG score in such a way that the ESG score of the fund's portfolio is at all times higher than the ESG score of the benchmark.
- To limit the investment risks, the portfolio is spread across countries, sectors and companies. The globally diversified

portfolio consists of at least 75 companies. The following criteria apply regarding active positions against the benchmark:

- Overweight or underweight positions in individual countries can be up to 30%.
- Overweight or underweight positions in individual sectors, as contained in the Global Industry Classification Standard ("GICS"), can be up to 20%.
- Overweight or underweight positions in individual companies are maximized at 5%.
- For efficient portfolio management, the fund may also invest in derivative products.
- The fund does not pursue its own foreign exchange policy. Currency risks in underlying investments are not hedged.

Entry and exit

You can buy or sell shares in this fund on any trading day via Euronext Amsterdam.

Dividend

The fund pays out a cash dividend at least once a year.

Risk and return profile

The indicator is a measure of the volatility of the price and the return potential. This fund invests worldwide in equities from developing and emerging countries and therefore its volatility is fairly high.

Historical figures used to calculate the synthetic indicator are not necessarily a reliable reflection of the future risk profile. There is no guarantee that the risk and return category shown will remain unchanged. The category may change. The lowest category does not mean that the investment is without risk.

The following risks are essential to this fund:

- Equity risk: The risk of loss in value due to negative movements in share prices.
- Currency risk: Risk of depreciation in currencies other than euro.
- ESG risk: As a result of the exclusion of companies or countries due to ESG criteria, the return of the fund may lag behind the benchmark.

For a complete overview of the risks inherent in this fund, please refer to the supplement to this fund and the section on risk factors in the prospectus.

Charges for this fund

The charges you pay are used to pay for the costs of operating the fund, including marketing and distribution costs. These charges reduce the potential growth of/return on your investment.

Non-recurring charges that are charged before or after you have invested	
Entry charges	0,200%
Exit charges	0,125%
This is the maximum amount that can be deducted from your investment	
Charges that are deducted from the fund each year	
Ongoing charges figure	0,60%
Charges that are deducted from the fund subject to certain conditions	
Performance fee	n/a

In this context, the fund's entry and exit charges refer to the increases and decreases in the net asset value that are charged on a net basis at the time of entry or exit respectively. These are credited to the fund and compensate for the transaction costs incurred by the fund.

In addition to the abovementioned entry and exit charges charged by the fund, your financial advisor, bank or distributor may, for example, charge additional costs. Please contact them for information about these charges.

The percentage of the Ongoing charges figure is based on the expenses for the whole year up to and including 31 December 2018. The percentage of the Ongoing charges figure may vary from year to year. It excludes portfolio transaction costs incurred by the fund. More information about charges can be found in the prospectus of the fund.

Past performance

	2014	2015	2016	2017	2018
Fund	14.6%	12.1%	8.0%	12.0%	-5.5%
Benchmark	16.3%	8.7%	9.1%	10.6%	-6.7%

Past performance does not guarantee future returns. The stated returns are after deduction of all charges, but before the effects of the income tax to be paid by the investor. The historical returns included here are returns derived from the historical returns of the fund from which this fund originated.

Currency: euro

On 22 February 2018, ACTIAM Impact Wereld Aandelenfonds was admitted to listing on Euronext in Amsterdam.

Before December 20, 2018, a composite benchmark based on regional MSCI indices was used. This composite benchmark has been replaced by the current benchmark.
